Encounters at the End of the World (2007)

Celebrated documentary filmmaker Werner Herzog takes you on a wild and woolly journey to the South Pole, from the National Science Foundation's headquarters on Ross Island to some of Antarctica's most remote and dangerous terrain. With a keen eye for the wonders and sometimes hilarious peculiarities of this icy land's animal and human inhabitants, Herzog offers an astounding look at the world's most inhospitable landscape in this Best Documentary contender for an Independent Spirit Award.
